

*"Biodiversity and society are closer than ever"*

*“At the Port of  
Vigo, we believe  
that the change  
is possible.  
It is time to act,  
it is time to do”*

OBJECTIVES OF THE PLAN BLUE GROWTH VIGO

CONNECTED PORT

GREEN PORT

INNOVATIVE PORT

INCLUSIVE PORT

SUSTAINABLE  
DEVELOPMENT **GOALS**

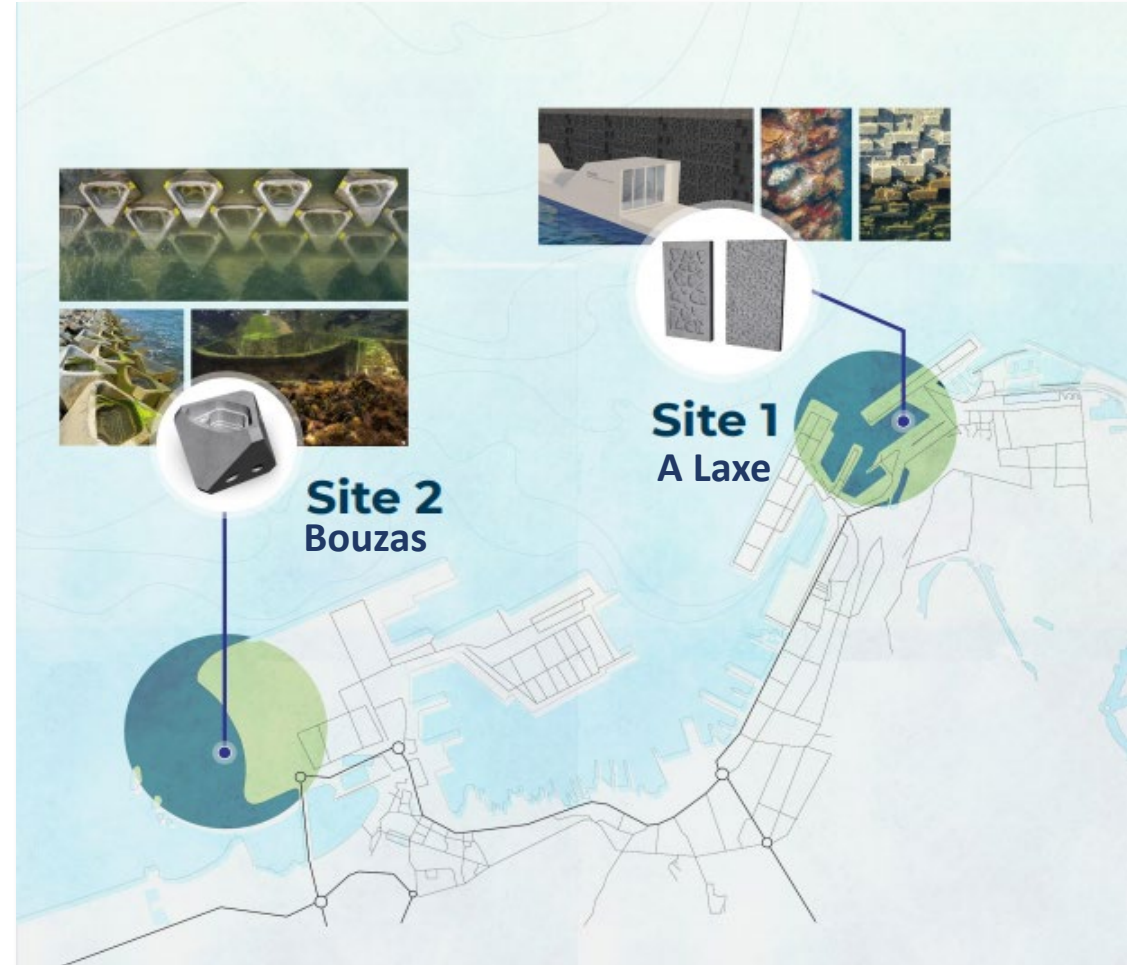

*“The **Living Ports project** aims to transform "grey" infrastructure in the port environment into "green" infrastructure, which evokes **natural processes** in artificial environments”*

LIVING PORTS  
P R O J E C T

*“To take care of the environment is not an option, is the way to do things”*

*“We combine the conservation and restoration of ecosystems (ecology) with the planning and design of port infrastructure (engineering)”*

*“Our philosophy :  
Environment and  
Innovation”*

# ***“Ensuring more prosperous ecosystems”***

- Duplicates biodiversity. RICHER and MORE DIVERSE marine life
- Ratio of native/invasive species 3:1
- Retain inorganic biomass 8 more times than regular concrete
- Reduction of noise pollution by up to 50% in the harbour and acts as a carbon sink(120 g of carbon per square meter of EConcrete infrastructure per year)
- Meets or exceeds international constructive standards
- Lower chloride penetration
- Longer lifetime

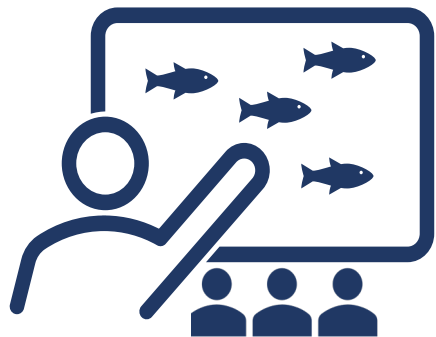

*The “Nautilus” opens up a window for the research and observation of the marine environment as it happens*

“We promote **education in sustainability** while strengthening the **relationship between the port and the city**”

***“TOGETHER we are stronger”***

***Thank you for your attention***
